

Overview:

FedMed is a scaffold for privacy-preserving cross-silo federated learning.

This document explains the local dashboard, demo API, and how the pieces fit together.

Feature 01: Description of component or step number 1 in the dashboard and demo.

Feature 02: Description of component or step number 2 in the dashboard and demo.

Feature 03: Description of component or step number 3 in the dashboard and demo.

Feature 04: Description of component or step number 4 in the dashboard and demo.

Feature 05: Description of component or step number 5 in the dashboard and demo.

Feature 06: Description of component or step number 6 in the dashboard and demo.

Feature 07: Description of component or step number 7 in the dashboard and demo.

Feature 08: Description of component or step number 8 in the dashboard and demo.

Feature 09: Description of component or step number 9 in the dashboard and demo.

Feature 10: Description of component or step number 10 in the dashboard and demo.

Feature 11: Description of component or step number 11 in the dashboard and demo.

Feature 12: Description of component or step number 12 in the dashboard and demo.

Feature 13: Description of component or step number 13 in the dashboard and demo.

Feature 14: Description of component or step number 14 in the dashboard and demo.

Feature 15: Description of component or step number 15 in the dashboard and demo.

Feature 16: Description of component or step number 16 in the dashboard and demo.

Feature 17: Description of component or step number 17 in the dashboard and demo.

Feature 18: Description of component or step number 18 in the dashboard and demo.

Detail 01: Implementation note, expected behavior, and recommended next steps for component 1.

Detail 02: Implementation note, expected behavior, and recommended next steps for component 2.

Detail 03: Implementation note, expected behavior, and recommended next steps for component 3.

Detail 04: Implementation note, expected behavior, and recommended next steps for component 4.

Detail 05: Implementation note, expected behavior, and recommended next steps for component 5.

Detail 06: Implementation note, expected behavior, and recommended next steps for component 6.

Detail 07: Implementation note, expected behavior, and recommended next steps for component 7.

Detail 08: Implementation note, expected behavior, and recommended next steps for component 8.

Detail 09: Implementation note, expected behavior, and recommended next steps for component 9.

Detail 10: Implementation note, expected behavior, and recommended next steps for component 10.

Detail 11: Implementation note, expected behavior, and recommended next steps for component 11.

Detail 12: Implementation note, expected behavior, and recommended next steps for component 12.

Detail 13: Implementation note, expected behavior, and recommended next steps for component 13.

Detail 14: Implementation note, expected behavior, and recommended next steps for component 14.

Detail 15: Implementation note, expected behavior, and recommended next steps for component 15.

Detail 16: Implementation note, expected behavior, and recommended next steps for component 16.

Detail 17: Implementation note, expected behavior, and recommended next steps for component 17.

Detail 18: Implementation note, expected behavior, and recommended next steps for component 18.

Detail 19: Implementation note, expected behavior, and recommended next steps for component 19.

Detail 20: Implementation note, expected behavior, and recommended next steps for component 20.

Detail 21: Implementation note, expected behavior, and recommended next steps for component 21.

Detail 22: Implementation note, expected behavior, and recommended next steps for component 22.

Detail 23: Implementation note, expected behavior, and recommended next steps for component 23.

Detail 24: Implementation note, expected behavior, and recommended next steps for component 24.

Detail 25: Implementation note, expected behavior, and recommended next steps for component 25.

Detail 26: Implementation note, expected behavior, and recommended next steps for component 26.

Detail 27: Implementation note, expected behavior, and recommended next steps for component 27.

Detail 28: Implementation note, expected behavior, and recommended next steps for component 28.

Detail 29: Implementation note, expected behavior, and recommended next steps for component 29.

Detail 30: Implementation note, expected behavior, and recommended next steps for component 30.

Detail 31: Implementation note, expected behavior, and recommended next steps for component 31.

Detail 32: Implementation note, expected behavior, and recommended next steps for component 32.

Detail 33: Implementation note, expected behavior, and recommended next steps for component 33.

Detail 34: Implementation note, expected behavior, and recommended next steps for component 34.
